

THERMOTECH UPDATE

Earth Day April 22, 2009

Thermotech is celebrating Earth Day 2009 by taking a broader look at what we as a company do to improve the environment.

Our products currently provide over 14 million cfm of clean fresh air for our customers worldwide. On average, this equates to over 17 million dollars per year in energy savings and a reduction in the carbon footprint of our customers facilities by over 113,500 tons of CO₂ per year.

Thermotech Can Show You How to:

- Provide Fresh Air to Your Facility
- Save Energy
- Upgrade Existing ERV's

Earth Day 2009

Thermotech Is Growing

Thermotech's new state of the art 41,500 sq. foot manufacturing facility is set to open in May 2009. The new facility features advanced manufacturing equipment that will further enhance our history of outstanding performance and reliability. The new facility is conveniently located 1 mile from the Tampa International Airport.

Spotlight on Manufacturer's Representatives

The Glacier Group is a manufacturer's representative firm dedicated to providing innovative, cost effective HVAC systems for commercial and industrial markets. Our solutions maximize Energy Efficiency while improving Indoor Environmental Quality (IEQ). The manufacturer's represented by The Glacier Group provide a complete offering of products necessary for a total building solution.

The Glacier Group has extensive experience with the health care industry, universities, laboratories, and other institutional projects. Providing solutions that help to minimize the impact of building systems on the environment is an integral part of our business. This commitment to the environment is evident in our partnerships with progressive manufacturer's like Thermotech.

Many building owners are seeking ways to reduce operating costs, while improving the indoor environment.

Thermotech energy recovery wheels are an integral part of our commitment to these customers. Visit our website to learn more about Thermotech energy recovery wheels.
